The 11th June, 1951.

S. P. JAIN,
for Registrar General, India.

NATIONAL SAVINGS CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 19th May 1951.

*In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

† Figures not available.

Explanation of symbols used :—B.—Births ; B.R.—Birth Rate ; C.—Cholera ; S.—Smallpox ; P.—Plague ; F.—Fever ; D. D.—Dysentery and Diarrhoea ; R.D.—Respiratory diseases ; M.D.—Maternal Deaths ; D.R.—Death Rate ; I.D.—Infantile Deaths (included in total deaths).

REMARKS

The figures of births and deaths shown in this statement for the week ending the 19th May, 1951, relate to 186 towns with an estimated population of 24,413 thousands. The total number of towns is 234 and their population is 29,017 thousands. Thus 79% of the total number of towns representing 84% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 13,154 and 8,623 representing birth and death rates of 28.0 and 18.4 per thousand population respectively.

(A) States (Parts A & C).—The data here relate to 167 towns with an estimated population of 21,653 thousands. Information about Assam and Bihar could not be included. The total numbers of towns is 202 and their population is 25,187 thousands. Thus 83% of the total number of towns representing 86% of the total population is covered. The numbers of births and deaths recorded in these towns were 11,683 and 7,679 representing birth and death rates of 28.1 and 18.4 per thousand of

population respectively. The table at the end gives the position of the States.

The towns of Aruppukottai, Tanjore and Virudunagar in Madras recorded high death rates of 54.9, 66.6 and 59.2 per thousand of population respectively. In Aruppukottai the high death rate was largely due to deaths from Cholera and dysentery and diarrhoea in Tanjore, the high death rate was not due to any one of the specified causes and in Virudunagar, the high death rate was mainly due to deaths from Cholera.

(B) States (Part B).—The data here relate to 19 towns with an estimated population of 2,760 thousands. The total number of towns is 32 and their population is 3,830 thousands. Thus 59% of the total number of towns representing 72% of total population is covered. The numbers of births and deaths recorded in these towns were 1471 and 944 representing birth and death rates of 27.7 and 17.7 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
